Skype for Business
Conferencing

with

Office 365

Replace Existing Conferencing Services with a Complete Meeting Solution Using Office 365

New PSTN conferencing

Use a dial-in number to join Skype meetings from any device, dial out to bring participants into the meeting.

Up to 250 participants

Allows for unlimited meetings per month no matter where your participants are.

Connected Meeting Experience

Create documents with style; polish work with others easily and enjoy a new reading experience on modern devices.

New Skype Meeting Broadcast

Reach up to 10,000 attendees for very large meetings. Attendees can join from virtually any browser and device.

Cloud Meeting Recording

Record Skype for Business meetings, including audio, video and shared content, and store and publish in OneDrive for Business or other locations.

...plus great benefits provided by the cloud!

Skype for Business is delivered as a per-user subscription that is easy to download and install on your computer.

You're Always Up to Date

With Skype For Business connected to the cloud, you always have the latest version of the desktop application, with background updates.

Integrated with Office

The powerful productivity of Office with Skype for Business allows you to collaborate on projects and share ideas.

Anywhere Access

Skype for Business goes anywhere you do.

Unite Clients on PCs, Tablets and Phones

Get all your communications and collaboration in one place.

How Can I Buy Conferencing with Office 365?

You can purchase Conferencing with any Enterprise plan or add it to the Skype for Business Plan 2.

Frequently Asked Questions

Do all my users have to be on a Skype plan to attend meetings?

No. Only the meeting organizers will need the Skype with Conferencing plan to send meeting invites that include dial-in phone numbers. Attendees who don't have the Skype plan will be able to attend from any browser or mobile device using the free app.

Can I add Dial-in Conferencing to other Office 365 Plans?

Dial-in conferencing (also called PSTN Conferencing) can be added to Business Essentials, Business Premium, E1, E3 and E5 Enterprise plans.

I'm also looking at other online conferencing apps. Why is Skype for Business better?

Conferencing with Skype for Business allows you to lower the TCO by consolidating all conferencing in one solution that has flexible deployment options and is accessible anywhere. The price value compared with the amount of features you get is truly unbeatable. The fact that you can integrate it with Office 365 puts it well ahead of the competition.
